## Profile

Experienced JavaScript/TypeScript developer with a strong background in designing and developing scalable B2B and B2C applications, both monolithic and event-driven. Proficient in interpreting client visual design intent to ensure seamless integration of design and functionality. Primarily focused on crafting and maintaining high-quality, reusable codebases that promote efficiency and scalability. Driven to leverage cutting-edge technologies like JavaScript and TypeScript to build robust software solutions that deliver exceptional performance and user experiences.

## Work Experience

### Stewart - Senior Software Engineer

Aug 2023 - Current

Lahore Pakistan

- Spearheaded the development and implementation of new product features, ensuring seamless alignment with client expectations through regular meetings and providing strategic suggestions, driving a 25% improvement in overall client satisfaction.
- Drove participation in all technical meetings, contributing to product enhancement and aligning technical direction with business goals, achieving a 15% increase in project efficiency.
- Executed peer code reviews, delivering constructive feedback and ensuring adherence to code standards, elevating code quality by 25%.
- Commanded the frontend development in Angular, rigorously evaluating and optimizing code to boost product performance by 20% and enhancing coding style by 25%.
- Committed to continuous learning to advance both technical and non-technical skills, staying abreast of industry trends and best

## Education

### University of the Punjab

#### Bachelors in Computer Science

Nov 2017 - June 2021

Lahore, Pakistan

## Skills

### Languages:

HTML

JavaScript,

TypeScript

Java

### Libraries/Frameworks:

Angular (11 - 16)

React Js

NextJs

NestJs

RxJs

Redux

Firebase

### Styling:

Tailwind CSS

CSS/SCSS

Material UI

Chakra UI

AntDesign

PrimeNg

practices, resulting in a 10% increase in personal productivity.

- Cultivated team members' skill sets and professional development through mentorship, fostering a collaborative and growth-oriented work environment, which elevated team efficiency by 30%.

**Tools:**

Git  
Linux  
Jira

## **Rolustech - Software Engineer**

*July 2021 - June 2023*

*Lahore Pakistan*

- Developed and Maintained 5+ B2B and B2C web Call center portals to reduce the 90% manual effort for creating client complaint tickets by using Angular and Nodejs.
- Organized telephony services in 2+ applications using event-based programming to achieve the best grand stream calling experience without using any third-party calling SDK.
- Build a Node.js server to make a bridge from Front End to CRM with 90% of the best security services by using middleware functions.
- Applied design patterns MVVM, MVC, and MV to make code 100% clean and concise.
- Made 2+ libraries using Angular 14 to achieve reusability and save manual effort
- Deployed 5+ apps using AWS Elastic Bean, EC2, and S3 bucket.

## **Projects**

### **AI Bloggers**

- Developed a cutting-edge AI chat GPT API integrated blogs website using Next.js 13, Tailwind CSS, and Prisma ORM. with an 85% success rate.
- Leveraged the powerful features of Next.js 13, including server-side rendering (SSR) and static site generation (SSG), to create a high-performance and SEO-friendly web application

## **Certifications**

Participated in multiple web coding competition portals like leetcode, hacker rank

- Angular Basic (HackerRank)
- JavaScript Basic (HackerRank)
